

Arc Guide to the Community Access for Disability Inclusion (CADI) Waiver

The Community Access for Disability Inclusion (CADI) waiver is one of several Home and Community-Based Services (HCBS) waivers available through Minnesota's Medical Assistance* program.

The CADI waiver is for individuals, both children and adults, who need the level of care that would otherwise be provided in a nursing home. Like all waivers, the CADI waiver provides supports to an individual to live where they want in the community.

To be eligible for CADI waiver services, an individual must:

- Be eligible for Medical Assistance (MA)
- Be certified as disabled by the State Medical Review Team (SMRT) or Social Security
- Be under the age of 65 when the waiver begins
- Be determined to need the level of care that would otherwise be provided in a nursing facility
- Have an assessed need for services and supports more than those available from other funding sources
- Make an informed choice for services in the community instead of a nursing facility

Individuals interested in the CADI waiver should contact their county of residence and ask about an assessment for services.**

Through the MnCHOICES assessment process, information is gathered to determine if the services:

- Are necessary for the individual's health, safety and welfare
- Are covered by any other funding source
- Meet the individual's needs, wants and preferences
- Costs are reasonable and customary

Service available through the CADI waiver:

- *24 - hour customized living*: Supportive services provided to a person who lives in a specific housing situation (a registered housing with services establishment)
- *24 - hour emergency assistance*: on-call counseling and problem solving, immediate response for assistance
